

## **FLOOR REHAB TECHNICAL DATA SHEET**

---

### **SLIP PREVENTION INFORMATION**

Slips, trips and falls represent a major cause of accidental death and injury, in both the home and work environment.

About one-seventh of all accidental deaths are due to injuries sustained because of a fall. Slip & fall litigation increases each year and liability insurance cost continues to rise. Without a floor care program that addresses the slip resistance under foot, all businesses are open to litigation.

### **BENEFITS:**

**SAFETY: REHAB** will allow you to maintain a slip resistant surface that exceeds UL standards and helps prevent slips and falls reduces costly litigation.

**SLIP RESISTANT:** Surpasses CSMA and UL standards, Develops a higher anti-slip coefficient than the base finish.

**FOOL PROOF:** Anyone that can mop a floor and operates a floor machine can use REHAB. No special training required.
